**A year in advance of the next show, registrations for Texprocess are already outstandingly high.**

There is huge demand amongst both German and international exhibitors; manufacturers of textile-processing machinery from 25 countries have already confirmed that they will be attending Texprocess, the leading international trade fair for the processing of textiles and flexible materials (14 to 17 May 2019). That means more companies, more floor space and, in addition, higher levels of international participation compared to an equivalent stage in the run-up to the previous show.

“The dynamism in the sector continues unabated. We could already feel that at the last Texprocess show. For Texprocess 2019, we expect further growth in terms of both exhibitor and visitor numbers. At the same time, we shall be able to see ever more extensively digitalised solutions,” says Olaf Schmidt, Vice President Textiles and Textile Technologies at Messe Frankfurt.

Among the exhibitors that have already signed up are all international market leaders, including Amann, Brother, Dürkopp Adler, Human Solutions, Juki Central Europe, Morgan Tecnica, Pfaff, Tajima, Veit and Vetron. After a period of absence, Lectra and Sunstar will again be represented at Texprocess. Amongst others attending for the first time will be Browzwear Solutions, INL International Technology and Siruba Latin America. China, Japan and Taiwan have all registered national pavilions.

Once again, the exhibitors represent all the stages in the textile-processing chain, from IT-supported design, through cutting, seaming and finishing technologies, to textile-product logistics and recycling. As a result, they are also of relevance, not only to the apparel industry, but also to the leather goods industry, furniture manufacturers and the automotive sector. Particularly strongly represented are exhibitors in the fields of CAD/CAM, Cutting, Making, Trimming (CMT), Sewing, Seaming, and Fixing, as well as those working in Automation and Information Technology. Strong growth is reported, too, in Finishing.

Techtextil, the leading international trade fair for technical textiles and nonwovens (14 to 17 May 2019), is, once again, being held in parallel with Texprocess. Techtextil, too, shows huge demand, with exhibitors

60327 Frankfurt am Main

from 44 countries currently signed up, also significantly exceeding the registration figures at the same stage in the run-up to the last event. In all, 1,789 exhibitors from 66 countries, together with a total of 47,500 trade and professional visitors attended Texprocess and Techtextil in 2017. Over 13,718 trade visitors came to Texprocess. On top of that, there were some 11,399 visitors who came across from the concurrently held Techtextil.

### **Changed Exhibition Centre Layout**

Because of the building work being undertaken at Messe Frankfurt's Trade Fair and Exhibition Centre, there will be a slight change to the exhibition layout of Techtextil and Texprocess. Related to this is the fact that there will, for the first time, be a shared hall that includes Techtextil exhibitors with a focus on functional apparel fabrics and exhibitors at Texprocess involved in fabric treatment and finishing. This hall will also house the 'Digital Textile Micro Factory', which will showcase a completely integrated and networked production line for apparel, as well as – for the first time – for technical textiles in other applications, too. In this hall, then, visitors will have an insight into the entire production process, from material to finished product.

It is still possible to register for Texprocess and Techtextil.

### **Background information on Messe Frankfurt**

Messe Frankfurt is the world's largest trade fair, congress and event organiser with its own exhibition grounds. With over 2,500 employees at some 30 locations, the company generates annual sales of around €661\* million. Thanks to its far-reaching ties with the relevant sectors and to its international sales network, the Group looks after the business interests of its customers effectively. A comprehensive range of services – both onsite and online – ensures that customers worldwide enjoy consistently high quality and flexibility when planning, organising and running their events. The wide range of services includes renting exhibition grounds, trade fair construction and marketing, personnel and food services.

With its headquarters in Frankfurt am Main, the company is owned by the City of Frankfurt (60 percent) and the State of Hesse (40 percent). \* preliminary figures for 2017
